

TIPS TO USE GOLAND

A walk through on my most used features in Goland.

CONTENT

- Theming
- Navigation
- Shortcuts
- Template
- Suggestion
- Plugins
- Tuning
- Key takeaway

THEMING

- Color
 - Dracula
- Fonts
 - FiraCode

NAVIGATION

- Most important shortcut: `Ctrl-Shift-A`.
- Customize shortcuts
- Locate things: file, package, related files,...
- Panels and splits

CODE

- Trace: callers, definition, super, implementations, ...
- Completions
- Refactoring
- Errors inspections

PLUGINS

- IdeaVim
- Wrap to columns

TEMPLATE

- Live templates
- File templates
- Postfix completion

TUNING

- [Speed up your Android Studio](#): the section *Tweak your studio.vmoptions file* is applicable for all JetBrains IDE, include Goland

KEY TAKEAWAY

- Tweak the settings to your liking.
- `Ctrl-Shift-A`: search anything
- `Shift-Shift`: search anything
